Universal System Solutions: The DVTEL Advantage

DVTEL's Universal System Solutions (USS) provide you with value-added, cost-effective advantages of purchasing preconfigured products, including servers, storage, workstations, monitors, and more.

Save Time

Our preconfigured, initialized, plug-and-play ready USS products will save you valuable time. We have configuration options to tailor your system and meet all of your needs. We also adhere to global standards that ensure consistency across all of your sites, regardless of location.

Optimize System Performance

Our USS products are optimized for ideal VMS performance, since they are designed by DVTEL who are experts in servers, storage, network, infrastructure, and VMS.

High Density & Power Efficient:

- Maximizes your rack space and minimizes cost
- Products are environment-friendly
- Long-term operating and power savings

Robust & Resilient:

- Network and power-fault tolerance protect from environmental and infrastructure failures
- Enterprise-grade components provide peace of mind

Receive Global Support

We are your single source for an end-to-end, worry-free solution. Our global 3-year Next Business Day ProSupport ensures timely replacement of hardware, including the dispatch of hardware specialists to your site if required.

Scale For Future Growth

Our USS products are scalable to meet your future growth needs and can be expanded at any time. The solution can accommodate up to 400 cameras and 624 TB per server.

Save Money

Underlying the technical and support value advantages of DVTEL's USS products are their competitive price.

The hidden costs of purchasing COTS products outside of DVTEL

- Configuring and initializing the products on your own will cost you valuable time
- Greater risk of an unreliable product that won't be able to deliver your needs or guarantee optimal system performance
- Additional service and support costs when you run into hardware/software issues
- Additional costs in scaling and expanding your system

Our USS Offerings

USS SMB Elite:

- Compact and efficient while delivering high performance
- Meets the needs of small to mid-sized businesses

USS Enterprise:

- Optimized to run Latitude NVMS
- Delivers maximum reliability, speed, and combination of internal storage, redundancy, and value

SSC Client Workstation:

- High performance and efficient
- Meets the needs of the basic to the most advanced security operation center
- Optimized for DVTEL suite of VMS products
