

Technical Certification Training

Latitude NVMS V6

This course is intended for Installers, Service Technicians, Application Engineers and Users of the DVTel line of IP-based physical security products. The goal of this course is for attendees to learn how to install, configure and operator DVTel's Latitude Network Video Management System (NVMS), including servers, client workstations and associated hardware. The course also covers troubleshooting procedures and techniques.

Strong computer skills, basic networking knowledge and a CCTV background are highly recommended for participation in this course.

Objectives

Upon completion of this course the student will be able to:

- Understand networking principles as they relate to the Latitude NVMS platform.
- Perform software installation and configuration of Latitude NVMS Servers and Clients.
- Perform all System Administrator functions, resulting in complete system configuration of the Latitude NVMS system using DVTel's AdminCenter software.
- Perform all Operator/Guard functions using DVTel's Control-Center Software.
- Perform installation and configuration of DVTel Encoders and Altitude IP Cameras
