

Technical Certification Training

Longitude IPAC V6

This course is intended for Installers, Service Technicians, Application Engineers and Users of the DVTEL line of IP Access Control products. The goal of this course is for attendees to learn how to install, configure and operate DVTEL's Longitude IP Access Control (IPAC) platform, including servers, client workstations and associated hardware. The course also covers troubleshooting procedures and techniques.

Strong computer skills, basic networking knowledge and an Access Control background are highly recommended for participation in this course.

2010 Spring Schedule

Corporate - Tuesday, May 25 - Thursday, May 27

Please check which dates you'd like for training.
(Classes are held from 8:00 a.m. - 5:00 p.m. each day)

Objectives

Upon completion of this course the student will be able to:

- Understand networking principles as they relate to the Longitude IPAC software.
- Perform software and associated hardware installation of Longitude IPAC.
- Perform all Administrator functions, resulting in complete system configuration of the Longitude IPAC software.
- Perform all Operator/Guard functions using Longitude IPAC.
- Monitor the system and troubleshoot issues.

Fax form to 201.368.2615 or go to www.dvtel.com/support/education for on-line registration.

Registration closes ten days before the scheduled course date. Classes with fewer than six attendees will be cancelled or rescheduled.

You will be billed directly for the cost of training. Cancellations within two weeks of a scheduled training session are non-refundable.

Each person is responsible for his or her travel expenses and for arranging their own accommodations.

Only two seats from one organization can be confirmed for a single training session. If seats become available within two weeks of a training session, they will be opened up for stand-by registrants.

Training is held from 8:00 a.m. to 5:00 p.m. each day. Early departure will result in non-completion of the course.
