

DVTel's Professional Engineering Services (PES) Group provides custom automation and operation and 3<sup>rd</sup> party integration to DVTel's intelligent Security Operations Center (isoc) platform so that every DVTel solution has the ability to be tailored to meet the requirements of the customer.

### List of Integrations

#### Access Control:

**Andover (F):** The DVTel-Andover Service integrates Andover's Continuum System with DVTel Latitude NVMS. DVTel acts as the front end.

**Andover (B):** The DVTel-Andover Service integrates Andover's Continuum System with DVTel Latitude NVMS. DVTel acts as the front end.

**Cardax:** The DVTel-Cardax Integration application integrates Cardax system with DVTel Latitude NVMS. DVTel acts as the front end.

**eMerge:** The Latitude-eMerge integration module connects DVTel's Latitude NVMS and IEP's eMerge access control system.

**Lenel(B):** The DVTel-Lenel (B) module integrates Lenel's OnGuard access control system with DVTel's Latitude NVMS. Lenel acts as the front end.

**Lenel(F):** The DVTel-Lenel (F) module integrates Lenel's OnGuard access control system with DVTel's Latitude NVMS. DVTel acts as the front end.

**SiPass(B):** The DVTel-SiPass module integrates Siemens's SiPass System with DVTel's Latitude NVMS. SiPass acts as the front end.

**SiPass(F):** The DVTel-SiPass integration module connects multiple DVTel's Latitude NVMS systems and Siemens's SiPass access control system. SiPass acts as the front end.

**Software House(B):** The DVTel Software House (B) module integrates Software House C•CURE 9000 System with DVTel Latitude NVMS. CCURE 9000 acts as the frontend.

#### Video Analytics:

**AgentVI:** The DVTel-Analytics module integrates AgentVI's video analytics engine with DVTel's Latitude NVMS.

**Mate:** The DVTel-Mate module integrates Mate's video analytics engine with DVTel's Latitude NVMS

### LPR:

**Vigilant:** The DVTel Vigilant module integrates Vigilant license plate recognition engine with DVTel's Latitude NVMS. The integration provides a seamless archiving and monitoring tool of events generated by Vigilant DSP CarDetector Fixed system inside Latitude's ControlCenter.

**HTS:** The DVTel HTS module integrates HTS's license plate recognition engine with DVTel's Latitude NVMS. The integration provides a seamless archiving and monitoring tool of events generated by HTS inside Latitude's ControlCenter.

### More...

**AD Matrix:** DVTel AD Matrix module enables Latitude users to add cameras connected to the American Dynamics matrix system to Google Earth maps within the Latitude system and request to view the cameras placed on the Google Earth map on any ControlCenter tile.

**Barco:** The DVTel-Barco integration provides the ability to control display on a Barco Wall from any DVTel ControlCenter workstation.

**Google Earth:** The DVTel-Google Earth integration incorporates DVTel NVMS with Google Earth's location-based presentation capabilities. While drilling down into the Google globe view, the user can view and interact with the configured Latitude cameras.

**Moxa:** The DVTel-Moxa module integrates Moxa's E2210 Active Network I/O unit with DVTel's Latitude NVMS.

**Senstar:** The DVTel Senstar module integrates Senstar's alarm annunciation, control and communication system with DVTel's Latitude NVMS

**Stentofon:** The DVTel-Stentofon module integrates Stentofon AlphaNet devices with DVTel's Latitude NVMS

## List of Applications

**AlarmWAV:** The Alarm WAV Plug-in is a Latitude ControlCenter plug-in, which provides user customization of audible alerts ControlCenter generates when a Latitude alarm is triggered in the system.

**LatiChat:** LatiChat is Latitude's chat application, with which ControlCenter users can communicate by sending text messages to one another.

**Multicast Addressing plugin:** Allows assigning multicast addresses of Live, Recorded, Audio streams and Camera Sequences based on custom formula.

**IP Interface:** The Latitude IP Interface extends Latitude's event-action paradigm and allows third-party applications to send commands and receive Latitude events over a TCP socket in the form of text streams.

**Macro Plugin:** The Macro plugin demonstrates the capability to execute custom-made actions using Latitude's plugin technology.

**Momentary Output Pin Change:** The Momentary Output Pin Change Module offers a solution via which a user can momentarily change the state of an output pin via a button in Control Center.

**Multi Directory Actions:** The Multi-Directory Action tool provides support for actions that are to be performed in another directory.

**Multi Directory Layout:** The Multi-Directory Layout tool allows a ControlCenter user to create, save and load layouts which display cameras, sequences and other Latitude entities from **multiple** Directory servers.

**Multi Directory Sequence:** Multi-directory sequence is defined as a display mode wherein several cameras from multiple connected Latitude systems are shown cyclically, each for a predefined amount of time.

**Serial Interface:** The DVTel Serial Interface is a Windows service that listens for command data received at a configured serial COM port and conducts camera and sequence switching on analog monitors defined in the Latitude NVMS.

**Serial To Serial:** DVTel Serial-To-Serial Connections application is a utility that enhances DVTel Latitude NVMS system that lets you connect two serial devices together, so that traffic to one serial device is forwarded to the other one.

**Snapshot Server:** DVTel Snapshot Server is a module that takes snapshots of live video of configured camera at a pre-configured schedule interval.

**Speech Plugin:** The Speech plugin utilizes Microsoft's Speech API and enables voice control over common ControlCenter functions.

**System Monitoring Tool:** System Monitoring Tool is a DVTel tool that runs on a scheduled, periodic, as well as manual basis to generate consolidated reports on system configuration, system status as of the report date, and screen shots of each camera.

**Voice Evacuation System:** The Latitude NVMS V6.0 Voice Evacuation System plug-in provides the capability to carry out public address communications to selected audio outputs within the Latitude system.
