

Mobile Advanced Applications

Professional Engineering Services

DVTel's Latitude NVMS mobile application and the Apple iPad and iPhone along with the Android and Microsoft phones comprise an exciting environment for real-time video monitoring and recording on-the-go. As a part of DVTel's Smart Security Solutions, this complementary advanced application allows users to monitor multiple cameras at one time, change the viewing pattern with a touch of the finger, control PTZ cameras and start and stop recording. All in real-time.

This solution is critical to the changing environment of physical security incident investigation. Now, a mobile device can be taken into the field so that a situation can be monitored and decisions and actions can be made instantaneously based on the best information available.

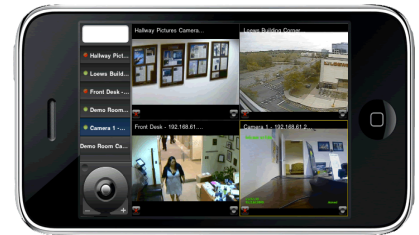

Highlights:

- Authorized User Login
- Privileges Enforcement
- Camera List View
- Multiple Tile Patterns Available
- View Up To Nine Live Cameras on iPad
- View Up To Four Live Cameras on Phone Apps
- Start and Stop Recording
- PTZ Camera Controls
- Preset Support
- On Screen Display
- Drag and Drop Video
- Live Video Indication
- Recorded Video Support
- Video Analytics Support
- Location (GPS) Support
- Manually Trigger Alarms
- Integration with Google Earth increases mobile guard safety and productivity by showing an incident's location.

iPad Advanced Application

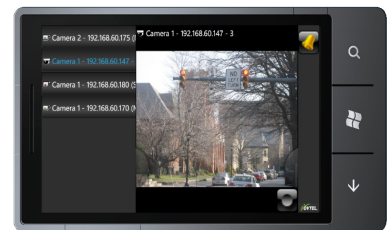

iPhone Advanced Application

Android Phone Advanced Application

WinPhone 7 Advanced Application

Technical Notes:

- Available on both WiFi and 3G
- Requires Transcoder Gateway in back-end infrastructure

The Mobile App VMS interfaces are products of DVTel's Professional Engineering Services (PES) Group which provides advanced applications that are unified with DVTel's intelligent Security Operations Center (iSOC) platform so that every DVTel Smart Security Solution has the ability to be tailored to meet the specific requirements of each customer.

More organizations require immediate business impact and return on investment in today's challenging economy, and the ability to integrate multiple edge data points and customize your system enhances the value beyond traditional security. DVTel focuses on a flexible solution that can change according to your needs. So, Think -Custom Applications. Think - Unique Solutions. Think - Synergy. Think - Open Platform. Think - Improved Operator Efficiency. Think - Improved ROI of your Existing Security Application. Think DVTel.
