

Template for IP Dome Camera

Mount using locking arms

Create an aperture in the mounting surface to a diameter of 5.3 inch (135mm) as indicated by **(T2)**. Place the Dome Base into the opening (with the two locking arms retracted).

Surface mount

Create three holes at template positions **(T4)** of diameter 1/5 inch (5mm) for use with the outer ring. Create four holes at positions **(T1)** of diameter 1/5 inch (5mm) for Dome Base. Create a 3/4 inch hole at template position **(T3)** for cable access.
