

Mexican Transport Firm Uses DVTel Unified Video and Access Control

DVTel iSOC provides security, protects assets, and helps ensure regulation compliance

Ridgefield Park, NJ, December 11, 2007 -- DVTel, Inc., ranked number one in market share by IMS Research and multiple award-winning market leader in the development and delivery of intelligent security solutions over IP networks, today announced that Transportes Aguila de Oro utilizes the DVTel intelligent Security Operations Center (iSOC) to provide unified video and access control at its offices and shipping terminals located in Monterey, Santa Rosa, and Laredo. GBS (www.gbsolution.com), headquartered in Monterrey, oversaw system planning and installation.

The system is a unified access control and video solution, comprised of 100 cameras and approximately 75 access points distributed in several buildings in the three cities. HID Global supplied key components of the IP-based access control system, including 45 iCLASS[®] readers, 25 VertX[™] V2000 readers, 4 bioCLASS[™] readers for the office and one EdgePlus[™] reader.

Transportes Aguila de Oro ships cargo throughout North America and as such must meet strict trade and terrorism compliance standards in order to carry on business smoothly. The iSOC video data and superior functionality enables Transportes Aguila de Oro to obtain necessary C-TPAT (Customs Trade Partnership Against Terrorism) certification. Such compliance demands close, effective control of cargo and cargo loading at all times. Another end user objective was to unify and control staff time and attendance, even at locations where there are no supervisors. The access control system also limits access in certain areas at specific times to only approved individuals. The video surveillance system watches all entrance and loading areas, as well as perimeters to minimize theft of assets.

The DVTel iSOC system custom interface is highly advanced with features that include a GPS map, a network map, and the full array of camera views. The system has been in operation for approximately six months and the company is pleased with its performance. “We have one system with one interface,” said Mr. Raúl Treviño, Transportes Aguila de Oro General Manager, “which lets us provide facilities with the highest standard of security certification for our customers. Furthermore, this unified system enables us to improve security while managing several different operations functions at the same time. We expect a substantial return on investment in terms of reduced theft, improved time and attendance, and more effective compliance with an ever-increasing set of demands in order to do business across Mexico, the US, and Canada.”

“The System is so open and flexible that it was very easy to integrate onto our network, and to operate and maintain it,” said Angel Rodríguez, Transportes Aguila de Oro CIO.

Eli Gorovici, DVTel CEO and President, likes what he sees, “Video has become a standard commodity, and access control the same. But combine the two functions and extend system capabilities to improve operations, all on the network with a robust interface, and now we have a unified, highly intelligent IP-based security solution.”

About HID Global

HID Global is the trusted leader in providing solutions for the delivery of secure identity, serving customers worldwide with proximity and contactless smart card technologies; IP-based networked access solutions; secure and custom card solutions; photo ID and ID card application control software; high definition printer/encoders and secure card issuance solutions. Headquartered in Irvine, California, HID Global operates international offices that support more than 100 countries and is an ASSA ABLOY Group brand. To learn more, please visit www.hidcorp.com.

About DVTel

DVTel is ranked #1 in market share in North America by IMS Research for the Network Video Software market. With more than ten awards for products and innovation, DVTel is both a pioneer and the dominant market player in the creation, development, and delivery of Multi-source Intelligence Systems over IP networks. Our software-based solutions create superior value by providing customers a unique level of freedom to focus on what’s most important—their primary business goals.

DVTel’s unified intelligent Security Operations Center (iSOC) V5 combines Longitude IPAC, Latitude Network Video Management (NVMS), video analytics capability, as well as other powerful management modules to create a rich integration platform that offers a single, highly intuitive graphical user interface. iSOC V5 is the only open standards, IP-based security management center that unifies all video, audio, data, access control, trend analysis and alarm management functionality into one enterprise physical security center.

DVTel is leading the transition from closed, proprietary security systems to open, standards-based platforms. Our unified solutions leverage existing network infrastructure while providing unmatched levels of flexibility, scalability, cost-effectiveness—all backed by superior customer support. We are the solution of choice worldwide for mission critical and enterprise level installations and our systems are found in thousands of installations around the globe.
