

DVTel Joins Open Network Video Interface Forum

DVTel Continues To Promote Standards with ONVIF Membership

Ridgefield Park, NJ, June 18, 2009 -- DVTel, Inc., multiple award-winning market leader in the development and delivery of intelligent security solutions over IP networks, today announced that it has joined ONVIF (Open Network Video Interface Forum) in support of the company's long-standing efforts to promote the importance of standards within the physical security market.

DVTel has been committed to open standards since the company's founding, providing an open platform, IP-based physical security solutions to the market as early as 2001. Today, DVTel has the largest number of end-to-end IP-based physical security solutions installed worldwide. As a leader in providing both IP cameras and networked video management solutions, DVTel's leadership has been watching the progress of ONVIF and the company understands that it is important to join both to support the endeavor and to provide useful feedback based on a decade of rich, real-market experience.

ONVIF's mission is the adoption of network video in the security market. The ONVIF specification will ensure interoperability between network video products regardless of who manufactures the product or software. The cornerstones governing ONVIF's work are:

- *Standardization* of communication between network video devices
- *Interoperability* between network video products regardless of manufacturer
- *Open* to all companies and organizations

"DVTel has been promoting the efforts of ONVIF behind the scenes since the organization was announced," says Eli Gorovici, President and CEO of DVTel. "We feel the time has come for us to participate in a more active role given our experience and we welcome the opportunity to do so. DVTel is dedicated to supporting ONVIF through our open standards IP platform and extended line of IP cameras. At DVTel, we strongly believe that standardization is the future of both networked video and IP-based physical security."

About DVTel

DVTel is the market leader in end-to-end IP physical security solutions around the world and is the recipient of over a dozen awards for products and innovation. As the pioneer and dominant market player in the creation, development, and delivery of Multi-source Intelligence Systems over IP networks, our software-based solutions create superior value by providing customers a unique level of freedom to focus on what's most important—their primary business goals.

DVTel is leading the transition from closed, proprietary security systems to open, standards-based platforms. Our unified solutions leverage existing network infrastructure

while providing unmatched levels of flexibility, scalability, cost-effectiveness—all backed by superior customer support. We are the solution of choice worldwide for mission critical and enterprise level installations and our systems are found in thousands of installations around the globe.
