

Telmex and DVTel Partner to offer the Mexican Enterprise market a Hosted, Managed Video Surveillance Solution

- The Telmex Video Vigilancia Administrada (Managed Video Surveillance), in partnership with DVTel, is a Solution for Video Monitoring and Control of sites such as Banks, office buildings, public buildings, schools, offices, shopping centers and anywhere required.
- The entire solution is implemented without the need for major investments by the customer and by leveraging existing infrastructure.

Mexico City , April 21, 2010 — Telmex, the leading telecommunications company in Mexico, and DVTel, multiple award-winning market leader in the development and delivery of intelligent security solutions over IP networks, announced today a technology partnership to offer the Mexican market a Hosted, Managed Video Surveillance solution targeted at large enterprises.

The solution allows the display of real time surveillance images, as well as recording the images, and bringing all of this information to a central monitoring site that the customer chooses, thus enabling the customer to monitor and supervise any office, branch or remote site. Customers can also increase the number of monitored sites at any time that the company requires it.

The Telmex Managed Video Surveillance is a solution that combines video monitoring, recording and control of devices with Telmex UniNet MPLS network services and the security of hosting at the Telmex Triara Data Center.

The solution allows companies to obtain direct savings in their investments, improve their business processes, increase the profitability of their operations and reduce costs, making it a service with great economic and operational benefits for companies.

Additionally, having a flexible and secure communications and video surveillance infrastructure without having to invest time and the procurement and maintenance of capital equipment, and without having to deal with the replacement of obsolete technology are all key factors that companies should consider to strengthen the continuity of its operations.

Telmex Managed Video Surveillance is a comprehensive solution that is paid through a monthly service fee, and includes:

- IP Cameras
- Integration of existing analog cameras
- Control Devices
- Licensing

- Installation
- 30 days, Continuous Recording
- Gold Maintenance with Spare Parts
- Support 7 x 24 x 365

Some of the benefits of the Telmex Managed Video Surveillance Solution in partnership with DVTel are:

- Turnkey solution with a single point of contact
- Ability to integrate platforms and existing closed-circuit TV equipment
- Reduction in infrastructure and inventories, eliminating technological obsolescence
- Scalability and flexibility to add new sites or cameras
- The best cost-benefit in the market for such services

About Telmex

TELMEX is a conglomeration made up of Teléfonos de México, S.A.B. de C.V., its subsidiaries and affiliates, which provides telecommunications services in Mexico. The company's coverage of services includes, among other things, the operation of the most comprehensive network of basic local telephone and long distance service. It also offers services like connectivity, Internet access, wireless, hosting and interconnection services to other telecommunications operators. More information about TELMEX can be found in www.telmex.com.

About DVTel, Inc.

DVTel's unified intelligent Security Operations Center (iSOC) V6 combines the Latitude Network Video Management System (NVMS), Longitude IP Access Control, ioimage video analytics intelligence, as well as other advanced applications to create a rich integration platform that offers a single, highly intuitive graphical user interface. iSOC V6 is the only open standards, IP-based security management center that unifies all video, audio, data, access control, trend analysis and alarm management functionality into one enterprise physical security center. DVTel offers a complete line of security level IP cameras to compliment the complete solution and is also integrated with hundreds of cameras from multiple manufacturers.

The DVTel unified solutions leverage existing network infrastructure while providing unmatched levels of flexibility, scalability, cost-effectiveness—all backed by superior customer support. DVTel is a proud member of both ONVIF and PSIA. DVTel is the solution of choice worldwide for mission critical and enterprise level installations and our systems are found in thousands of installations around the globe.
