

## Smart Management Software

### The Latitude Network Video Management System (NVMS)

The Latitude NVMS is a fully scalable enterprise level media management system. This advanced network-based system enables simultaneous live monitoring from multiple stations and is easily configurable for storage both on and off site. The software can be configured to store and to view from one to thousands of cameras and monitor connections across an unlimited number of servers. The software comes in three versions:

#### Solus VMS

Up To 64 Camera Configurations

#### Classic

Up To 70 Cameras

#### Elite

Up To 250 Cameras

#### Enterprise

Unlimited Cameras

## Security Operations Center Advanced Applications

#### SceneTracker Video Stitching

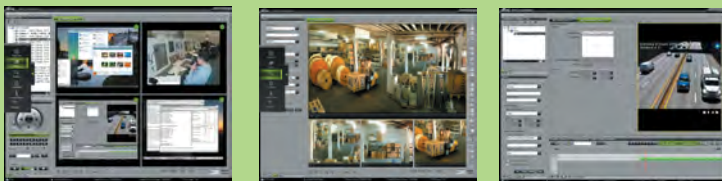

DVTel's award-winning SceneTracker Video Stitching Software solution provides a real-world, real-time perspective for multiple camera images in a single, integrated view.

#### Casebuilder Incident Reporting and Management System

CaseBuilder is used to create detailed report folders to track and administer evidence on cases generated by DVTel's intelligent Security Operations Center and all other digital sources.

#### Google Earth, iPad and iPhone Apps

DVTel's Professional Engineering Services Group develops applications so companies can incorporate the latest technology to support their security and operations efforts.

## Intelligent Edge Devices

### Altitude IP Cameras

4 Lines of IP Cameras Available

Fixed • PTZ • Mini Dome

#### Pro Classic

Entry Level  
Cost Effective

#### HD Classic

720p Version  
Cost Effective

#### Pro Elite

Up To D1 Resolution  
Feature Rich

#### HD Pro

1080p Version  
Feature Rich

### IP Encoders and Decoders

Single and Multi-port Versions Available  
H.264 and MPEG-4

## ioimage Edge Based Video Analytics

#### Intelligent IP Cameras

Fixed and PTZ  
Built-In Analytics  
PTZ Autonomous Tracking  
Wide Dynamic Range  
Picture in Picture Auto Tracker

#### Intelligent Encoders

For Edge and Centralized Use  
Built-In Analytics  
Up To 8 Channels  
CIF to 4CIF

Perimeter Intrusion Detection, Automated Detection,  
Autonomous tracking of intruders, Suspicious Baggage,  
Stopped Vehicles, Removed Items

Synergy between Smart Central  
Management Software and  
Intelligent Edge devices
