

Quick Install Guide

sc1dn-S and trk-101

ioimage

1. plug in

1. Network (Ethernet)
2. Camera/Video Source (not required for ioimage cameras)
3. Properly rated power supply

2. browse

1. Click the DNA icon and run the DNA utility (DNA.exe). DNA discovers all devices on the network.
2. If there are authenticated devices, on the DNA toolbar, click the **Login** icon and enter login credentials for the devices.
3. If there are devices located on a separate VLAN, add them manually by clicking **Add Device Manually** on the DNA toolbar.
4. Enter the unit's default IP address (A) in your browser.
5. When the **Login** window (B) opens, enter the trk-101 or sc1dn-S default user name and password.

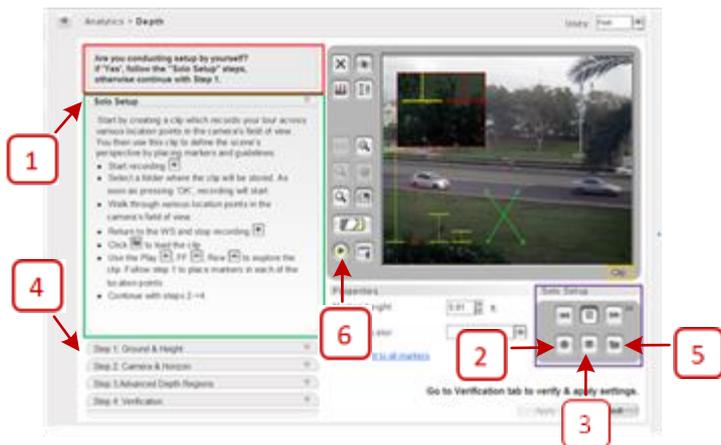

3. set PAL/NTSC

1. From the Live View window, access the Camera Setup by clicking **Setup > Camera > Streaming**.
2. In the **Video Standard** box, select the required video format (PAL/NTSC). By default, NTSC is the default Video Standard selection.

Once the standard has been selected, confirm that other predefined settings will be deleted.
3. When completed, click **Apply** to save settings.

4. solo setup

1. From the Live View window, select **Setup > Analytics > Depth > Solo Setup**. The following instructions are displayed on the screen.

2. On the Solo Setup control keypad, click the **Start Recording** icon and select a folder where to store the clip.

3. Press **Stop Recording**.

4. Proceed to the tab for **Step 1: Ground & Height** to place ground and height markers and guidelines in the clip.

5. Click **Browse** to load and view the clip. Navigate the clip and add human markers.

6. Exit Clip mode and return to Live mode by pressing the round **Play** button on the control panel located to the left of the monitor.

Continue setting depth by proceeding to the tabs for Steps 2-4. Follow the on-screen instructions. Expand the **Help** section included with each step for detailed information.

Verify that the settings provide an accurate representation of the sizes and distances in the scene.

When finished, click **Apply** to save settings.

5. select rule

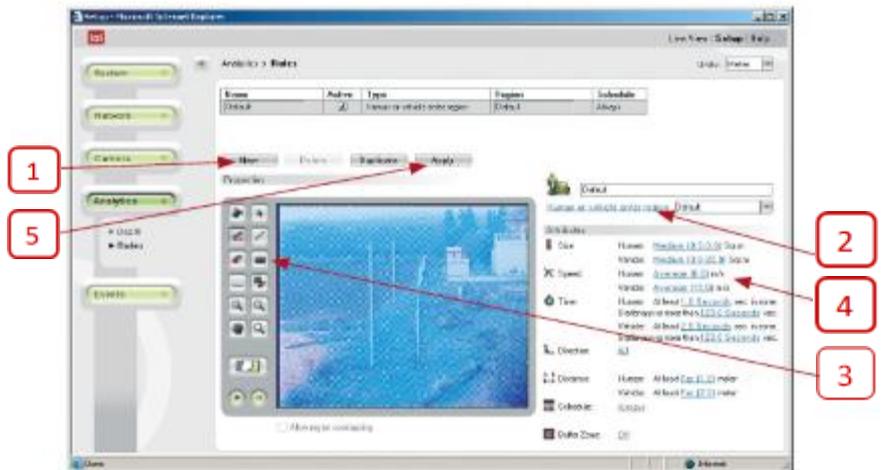

From the **Setup** tab, select **Analytic > Rules**.

A rule for detecting humans or vehicles entering the scene (blue masked area) is defined by default.

You can activate rules, modify settings, delete, or add a new rule.

To create a new rule:

1. Click **New**.
2. Select the rule type.
3. Draw on the video scene where you want the detection to take place.
4. Define the attributes for detection.
5. When finished, click **Apply** to save the settings.

6. detect

1. From the **Live View** window, select **Setup**.
2. Select **Arm**. The camera is ready to use.

Notice: Failure in part or in whole of the installer, owner, or user in any way to follow the prescribed procedures or to heed warnings and cautions provided in the installation and user manual shall absolve DVTEL and its agents from any resulting liability.

Warning: THIS EXAMPLE IS FOR DEMONSTRATION PURPOSES ONLY. For deployment in live applications, such as security, safety and loss prevention programs, installers, owners and users should read and follow the installation and user manual prescribed procedures provided. Installation should follow safety, standards, electrical codes and security best practices as well as the laws that apply where the units are being installed.
