

DVTEL Level Integration (B) - DVTEL As Back End Applications & Integration Center

The DVTEL Level (B) module integrates DVTEL's Latitude NVMS with Lenel's OnGuard access control system. The integration extends OnGuard capabilities by allowing users to view live and recorded video from Latitude cameras within OnGuard client application and more.

From within OnGuard client applications, operators can view live and recorded video from Latitude cameras based on events or upon manual request.

Furthermore, users can control PTZ enabled cameras from within OnGuard clients.

The integration's alarm monitoring and map support allows users to easily monitor camera events such as Motion Detection and Accessibility within OnGuard.

DVTEL's Applications & Integration Center (AIC) group provides custom automation and operation and third-party integration to DVTEL's intelligent Security Operations Center (iSOC) platform so that every DVTEL solution has the ability to be tailored to meet the requirements of the customer.

DVTEL Lenel Integration (B) - DVTEL As Back End

Video monitoring

- User can view live video of Latitude cameras within OnGuard applications.
- Control PTZ cameras with supported Pan, Tilt, Zoom, Focus, Iris and Go to Preset operations.
- Users can launch video via camera icons on maps.
- Display current status of camera: recording or not.

Recording and Playback

- User can play recorded video of Latitude cameras within OnGuard applications.
- Status Bar displays information about the video being played. On the left side, it displays the camera id that is being played, the right side displays current time of the playing video and the recording status of the camera that the video belongs to.

Events, triggers and actions

- Monitor Latitude camera accessibility and motion detection events via OnGuard's Alarm Monitoring application.
- Support for motion detection events.
- Support for communication lost event.
- Support for communication recovered event.

System

- Users can configure Latitude cameras in OnGuard system.

Latitude NVMS infrastructure

- Users enjoy the variety of Latitude features such as support of the most popular brands IP cameras and encoders, use of multiple video compressions, resilient architecture that supports camera, encoder and server failover and much more.
- The highly customizable DVTEL's Latitude Control Center client application can provide additional flexibility in viewing, recording and exporting audio and video to satisfy the needs form more complex video and audio tasks as well as monitoring a wide range of events and alarms. The advanced features of the DVTEL Latitude NVMS are always available for its users.
